Web Design & Development Programme

Front End Development

- Introduction to the course
- Atom setup
- HTML document structure
- HTML elements - div and span
- HTML elements - i, b, p, and a
- HTML elements - ul, li, and ol
- HTML elements - header and footer
- HTML elements - section, main, and article
- HTML elements - h1-h6 and aside
- HTML tables
- Project #1 - HTML text site
- Images
- Forms
- Inputs
- Checkboxes
- Radio buttons
- Select, option, and buttons
- HTML5 videos
- HTML5 audio
- Doctypes
- Meta tags

Duration- 6 month

- Targeting color and background
- Element specificity
- ID targeting, margin, and border
- Padding, margin, and float
- Max-width and background-image
- Switching over to an IDE
- Font weight, style, and family
- Text decorations
- Text spacing
- Text decoration modification
- Text shadow
- Pseudo-states
- Border radius
- Positions
- Pseudo-elements
- Z-index
- Viewpoint width and height, overflowing content
- Transition property

Javascript

- Intro to JavaScript
- Alerts and console logging
- Integers, strings, and variables
- Undefined variables
- and modifying values of variables
- Boolean operators
- Comparing values
- If statements
- For loops
- Defining functions
- Event handling
- Setting an elements innerHTML
- Arrays
- Textareas and getting the value of inputs
- Functions - parameters and return values
- Multiple parameters in functions
- Flexible function parameters
- Exercise - find the missing number
- Exercise solution
- Classes explained
- Class constructor, instance variables,
- and static variables
- Extending classes

JQuery

- jQuery setup
- Targeting elements
- Event handling
- Dropdown menus
- Making our dropdown disappear
- Multiple targets, events, and attr method
- Prepend, append, and html
- preventDefault
- event.which and switch properties
- Custom context menu, pageY, and pageX
- is method
- Writing our own version of jQuery
- Find method
- First and last
- Focusin and focusout
- Contains, is, and hasClass
- Each method
- Callbacks
- 07:14
- CSS

PHP & MYSQL

Back End Developer

- Introduction
- What is PHP
- What are Front-End and Back-End Languages
- Environment Setup
- PHP echo(Run Hello world)
- PHP Comments
- PHP Variable and its type
- Embedding PHP within HTML
- Case Sensitivity in PHP
- PHP echo & Print Statement
- What are Die and Exit Functions in PHP
- Basic DataTypes in PHP
- PHP Constants
- Coding Challenge #1
- Operators in PHP(Arithmetic Operators)
- Operators in PHP(Assignment Operators)
- Operators in PHP(Comparison Operators)
- Operators in PHP(Incrementing and Decrementing Operators)
- Operator in PHP (Logical Operators)
- Operator in php (String Operators)
- Coding Challenge # 2
- PHP Get Method
- PHP Post Method
- Create Form In PHP
- Global and local Variable
- If Statement
- Else Statement
- If Else if Statement
- Switch Statement
- For Loop
- For Each Loop
- Nested For Loop
- While Loop
- Do while Loop
- PHP Arrays
- PHP Associative Array
- PHP Multidimensional Array
- PHP Sorting Array
- Create a Table with help of For loop

Defining and Creating a Function In PHP
- Functions with Parameters
- Passing Arguments by Reference
- Functions returning value
- Functions with Optional Parameters and Default Values
- Dynamic Function Calls
- PHP anonymous functions
- PHP Variable Scope
- PHP Recursive Functions
- Coding Challenge 5
- PHP Break
- PHP Continue
- PHP Math Operations
- Coding Challenge #6
- HTML Forms
- Form Handling
- Forms Required
- Coding Challenge #7
- PHP Include File
- PHP Include File
- PHP Cookie
- PHP Session
- PHP Date and Time
- PHP Filters
- Custom Error Handling
- Exceptions Handling
- PHP Open File
- PHP Write,Overwriting & Append File
- PHP Delete File
- PHP File Upload
- PHP Download File
- File Size

- **Live Project**
- **Live Web Hosting**
- **Live C-Panel**

HTML 5

- Introduction to the course
- Atom setup
- HTML document structure
- HTML elements - div and span
- HTML elements - i, b, p, and a
- HTML elements - ul, li, and ol
- HTML elements - header and footer
- HTML elements - section, main, and article
- HTML elements - h1-h6 and aside
- HTML tables
- Project #1 - HTML text site
- Images
- Forms
- Inputs
- Checkboxes
- Radio buttons
- Select, option, and buttons
- HTML5 videos
- HTML5 audio
- Doctypes
- Meta tags

- Targeting color and background
- Element specificity
- ID targeting, margin, and border
- Padding, margin, and float
- Max-width and background-image
- Switching over to an IDE
- Font weight, style, and family
- Text decorations
- Text spacing
- Text decoration modification
- Text shadow
- Pseudo-states
- Border radius
- Positions
- Pseudo-elements
- Z-index
- Viewpoint width and height, overflowing content
- Transition property

CSS 3

- What is CSS3?
- Inline CSS
- Exercise: Inline CSS
- CSS Comments
- Internal CSS
- Exercise: Internal CSS
- External CSS
- Exercise: External CSS
- Linking CSS
- Exercise: Linking CSS
- How to Debug CSS Code
- CSS Selectors

- Universal Selector
- Type Selector
- Class Selector
- ID Selector
- ID vs Class Selector
- Attribute Selector
- Child Selector
- Descendant Selector
- Adjacent Sibling Selector
- General Adjacent Sibling Selector
- Pseudo Class and Elements
- CSS Precedence Rules
- Colors and Text

Php Basics

- Download Course Material for PHP
- Setting up the PHP Environment
- Ampps Url Links
- Introduction to PHP
- PHP Language Basics
- Variable and Constants
- Expressions and Operators
- Data Types
- Namespaces
- Control Structures
- Strings
- Arrays
- Functions
- Handling Exceptions
- Files
- Date and Time

JQuery

- jQuery setup
- Targeting elements
- Event handling
- Dropdown menus
- Making our dropdown disappear
- Multiple targets, events, and attr method
- Prepend, append, and html
- preventDefault
- event.which and switch properties
- Custom context menu, pageY, and pageX
- is method
- Writing our own version of jQuery
- Find method
- First and last
- Focusin and focusout
- Contains, is, and hasClass
- Each method
- Callbacks
- 07:14
- CSS

MYSQL

- Create Table
- Drop Table
- Insert Statements
- Select Statements
- Operators - ISNULL, LIKE, ORDERBY
- Update Statements
- List of all SQL Statements

Javascript

- Introduction to JavaScript
- Internal JavaScript
- Comments in JavaScript
- External JavaScript
- Inline JavaScript
- Exercise with JavaScript
- JavaScript Terminology
- How to Debug JavaScript Code
- Introduction to JavaScript
- Things to Remember
- Summary: What you have learned in this Section
- Objective: What you'll learn in this Section
- Identifiers
- Variables and Constants
- Primitives
- Keywords
- Reserved Words
- Assignments Operators
- Comparison Operators
- Arithmetic Operators
- Logical Operators
- String Operations
- Quotes
- Boolean
- Arrays
- Date and Time
- If Statements
- Switch Statements
- While Statements
- for Statements
- JavaScript Language Syntax
- Things to Remember

MYSQL WITH MYSQLI

- Database Connection
- Display Records
- Insert Records
- Update Records
- Delete Records
